The certification processes of the iSQI conform to the high standards of the ISO 17024:2003 personnel certification standard, which ensures the independence of the examination of the training and results in a high degree of quality and transparency of personnel qualifications. This was confirmed to the iSQI on 29th April 2009 in an independent audit, which was certified by the auditor Dr.-Ing. Burkhard H. Krüning. After the certification according to ISO 9001:2008 in the previous year, iSQI has now successfully achieved the next big step in its quality policy. “We work in conformance with ISO and keep our quality promise as market leader in personnel certification.

This we have certified by an independent institution in order to offer our customers a maximum in security and transparency”, emphasized CEO Stephan Goericke after the successful audit.
